VINIFICATION AND AGEING

Riserva Ducale Oro is produced with grapes that are carefully selected during the harvest. The alcoholic fermentation and maceration, aided by racking and délestage, takes place in temperature-controlled stainless-steel vats for 21 days. The malolactic fermentation takes place in concrete vats. Riserva Ducale Oro Gran Selezione is aged for about 36 months, including the first 12 months in concrete vats, followed by 12 months of ageing in barriques used for more than four years and a final 12 months in large Slavonian oak casks.

Alcohol content: 14,5%

VINTAGE 2020

A wholesome vintage, with a considerable reduction in the yield and swings in temperature, especially in September.

First vintage: 1947

WHY?

- Riserva Ducale Oro preempted the Gran Selezione concept. It was invented in 1947 as an additional selection of Riserva Ducale, Chianti Classico Riserva. Produced entirely on the Ruffino estates of Gretole and Santedame in the municipality of Castellina in Chianti.
- One out of every three bottles of Chianti Classico Gran Selezione opened in the world is Riserva Ducale Oro.
- Riserva Ducale Oro received 94 points from James Suckling in the last two vintages.
