

PROSECCO

TREVISO DOC

Vineyards

The grapes used to make this wine only come from our Poderi Ducali Estates in Veneto.

Soil: deep soils consisting of conglomerates of rock and sand with an abundance of clay and iron.

Altitude: variable from 100 to 250 meters above sea level

Grape varieties

>=85% organic Glera and other organic Prosecco grapes (Ampelographic Base - Prosecco DOC Production Guidelines Art 2)

First vintage: 2018

Vinification and ageing

The carefully selected grapes are pressed to obtain the must. Only a part of the must will undergo alcoholic fermentation to become wine; the remainder is stored in the cellar at zero degrees. This process guarantees the availability of a quality cuvée long after the harvest. Before the sparkling process, the must and the wine are blended and re-fermented in pressurized tanks using selected yeasts according to the Charmat method. This process, which lasts about a month, guarantees refined perlage and preserves the typical fruity aromas of the variety.

Alcohol content: 11%

Tasting notes

Perlage: small, fine and persistent.

Color: straw yellow.

Aroma: fruity and floral with apple, pear and elderflower.

Tasting profile: refreshing with a citrus and peach finish.

Why?

- Entirely produced from the Ruffino Estates of Poderi Ducali in Veneto, the Glera grapes to produce Prosecco Doc Organic are a true selection of the property.
- Ruffino applies to Prosecco strong quality standards and a strict process: after the pressing, the juice is frozen, allowing always fresh and neat aromas in the glass.
- Glera is a grape that's native to northeastern Italy, which has been known since Roman times. A white grape, it has hazelnut-hued vine shoots and produces large, long bunches with yellow-golden grapes.
